**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3632

This is an office action for serial number 10/647,690,  
entitled Artist's Easel, filed August 25, 2003.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs  
of 35 U.S.C. 102 that form the basis for the rejections under  
this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or  
a foreign country or in public use or on sale in this country, more than one  
year prior to the date of application for patent in the United States.

Claims 18 rejected under 35 U.S.C. 102(b) as being  
anticipated by Tolegian 3,006,107. The following rejections are  
based on the subcombination of the easel alone. Tolegian  
discloses a vertical support means ( 18, 24, and 10), a vertical  
translation means (36 and 37), a horizontal support means (29  
and 30).

Claims 12, 13, 18, and 19 are rejected under 35  
U.S.C. 102(b) as being anticipated by Rohlfing 1,699,544.  
Rohlfing discloses a vertical support means (41), a pulley  
weight track (between flanges of 41), a first and second pulley  
wheels tracks (outer surface of 41), a vertical translation  
means (90, 92, 83, and 89, see figure 2, 7, and 8) having a  
first and second pulley including rollers (90), weights (92),

and wheels (69, 67), a horizontal support means (57 and 51), a floor bracket (33), a ceiling racket (47), a stabilizer plates (71), a brake bracket (near 76).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 5, 11, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tolegian in view of Rohlfing 1,699,544 as discussed above. Tolegian discloses a first and second vertical support member/means (18), a first and second horizontal support members moved independently of one another (29 and 30), first and second wheels (32), a wheel track (28), a ceiling bracket (24), a floor bracket (12). Tolegian discloses all of the limitations of the claimed invention except for the first and second pulley. It would have been obvious to one having ordinary skill in the art to have made the vertical support members including first and second pulleys, stabilizer

plates and the horizontal members extending into the vertical members as taught by Rohlfing for the purpose of providing a better means of moving the horizontal members up and down the vertical members resulting in a smooth transition between positions.

***Allowable Subject Matter***

Claims 4, 6-10, 14-17, and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose a first and second brake clamps that surrounds said first and second vertical support members and said first and second stabilizer plates respectively; a first pulley assembly includes first and second wheels positioned on opposite sides of said first horizontal support member, and an axle extending through said first and second wheels and said first horizontal support member; a third and fourth pulley assembly; a rail sleeve slidably mounted on said first horizontal support member and securing a first edge of an artist work piece.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art discloses conventional easels.
